High Pressure Catheter Molding

## Pneumatic Hose Whip Protection with HoseGuard®

Pneumatic hoses transport compressed air to all areas of most factory floors, supplying the necessary energy to perform any number of processes that help make the products we use every day.

Sometimes, a hose gets pinched, snapped or it can break and/or disconnect from a process

causing pneumatic hose whip.

**A whipping hose can be very dangerous to personnel and potentially damaging to equipment. Pneumatic hose whip protection is as simple as HoseGuard.**
