

## Microfluidics - Pressure Driven Flow Control

### Custom Pneumatic Solutions *is how we built our reputation and our business*

Proportion-Air offers complete engineered custom pneumatic solutions to meet your flow, pressure and vacuum control needs. Our engineering department **boasts over 120**

**years of combined experience** in the field of electro-pneumatic systems and industrial controls and we are well-equipped to solve the most challenging custom applications.

**From prototype to development to full-scale production**, our design team offers you the technical knowledge, expertise and proven capabilities that have helped drive the development of some of the best proportional electro-pneumatic pressure devices in the world.

## Microfluidic Applications & Real-World Consumer Benefits

Do a quick web search for "microfluidics" and you'll find information from scientific journals and specialized organizations, all discussing in-depth microfluidic applications without much explanation on what the phrase entails. It's a challenging concept to grasp, especially...
